P.O. Box 216, Lexington, MA 02173 (617)641-2930 1-800-637-ROOT

We have genealogical software to fit your pocketbook and requirements!  
We offer the following:

**LINEAGES/STARTER™ -- \$29.** This is a value packed super starter! Store data for up to 570 people, **print alphabetic lists** in a wide variety of ways (including names that sound alike), **print descendants charts**, and **print three kinds of ancestor charts** on your standard Commodore printer. We supply one program disk, one ready-to-use data disk, and an easy to understand manual.

**LINEAGES/STANDARD™ -- \$49.** Does everything **LINEAGES/STARTER** will do and more! Store information for up to 570 people per disk, **use as many disks as you like**, and cross reference among them -- no limit on the number of people! Use your standard Commodore printer to **make charts, alphabetic lists, address labels, and information sheets** showing what you stored for each person. **Print stories made with almost any word processor** along with each person's information. **Print blank charts.** We supply one program disk and an easy to understand manual; the software will make your new data disks.

**LINEAGES/ADVANCED™ -- \$99.** Much greater variety and control than **LINEAGES/STANDARD!** Use almost any printer and up to 4 disk drives. **Customize the program** to your preferences (example: make it always print last name first). Add information of special interest to you (example: occupation). **Do searches** in a wide variety of ways. Use our **small word processor** to make stories and histories to go with your standard facts. **Print group sheets** on your 120 column printer. **Reorganize your data.** Comes with two program disks, manual, and full phone and mail support.

**FAMILY ROOTS™ -- \$225.** THE foremost genealogical software package. Does the same basic tasks as **LINEAGES/ADVANCED**, but with a great many more variations. Use the function keys for quick entry of repetitive place names or surnames. Include the information for spouses in the descendants charts. Select 4 or 5 generations for the standard ancestor charts and have them linked and numbered automatically. Make a chart showing only the father's line. **Print group sheets on any printer.** Trace a line of relations on the screen and send only those you wish to the printer. **Print large lists of names easily,** include the information of your choice (example: birthdate), or include only those people whose surnames start with a selected letter. **Select which information to include in the charts, person sheets, and group sheets.** There are so many possibilities that we can't state them all here. Comes with two program disks, easy to understand manual, and full phone and mail support.

**TREE CHARTS™ -- \$60.** A great supplemental program to both LINEAGES™ and FAMILY ROOTS™ allowing you to create and print a graphical representation of your family tree. You can create trees showing ancestors, and descendants. You can prune trees, remove unwanted branches, save trees to disk, update trees. Several printout formats are available. Comes with one program disk, an easy to understand manual, and full phone and mail support.

### Please Note These General Remarks.

- 1) Data disks for all our C-64 programs are compatible with each other.
- 2) Our special upgrade prices for registered customers allow you to move easily to a program with more features.
- 3) The standard data that you may store for each person includes name, sex, birth date and place, death date and place, address for living people, parents, children, spouses, marriage date and place for each spouse, and notes.
- 4) Data storage is free-form in style. You are not limited to fixed lengths.
- 5) Charts and other forms can be printed or displayed for any person in your data.
- 6) All of our genealogical software carries an unconditional 60 day money back guarantee.
- 7) Our program disks are not copy protected. A copy program is included to make backups for your own use.
- 8) Coming: **FAMILY MOVE™** will allow you to exchange data with other users of our software on Commodore AND other machines.
- 9) **FAMILY ROOTS™** is also available for the Commodore 128 in its native mode. Note: our C-64 version also works on the C-128.
